

Sachin Avutu

646-901-3556 | ssa87@drexel.edu | github.com/ssavutu | linkedin.com/in/ssavutu | Philadelphia, PA

EDUCATION

DREXEL UNIVERSITY | *Bachelor of Science in Computer Science* Anticipated Graduation: June 2029

RELEVANT COURSEWORK

Introduction to Computer Science, Computing Informatics and Design I – III, Computer Programming I – II, Calculus I-III, Principles of Microeconomics

SKILLS

Programming Languages Python, C#, C, C++, JavaScript, HTML, CSS, Dart, SQL, Regex, JSON, BASH, LaTeX, Markdown

Libraries and Frameworks .NET, NUnit, Flutter, Selenium, BeautifulSoup, SQLite, Gemini API, Flask, MariaDB, NumPy

Software Linux, Git, GitHub, GitLab, Bitbucket, Jira, Confluence, Octopus, Jenkins, Apache, NGINX, Vim, Visual Studio Code, Rider, Microsoft 365

EXPERIENCE

eMONEY ADVISOR

Radnor, PA

Software Engineer Co-op

Sep 2025 – Mar 2026

- Developed and maintained .NET code within a 33-engineer SAFe agile team using Jira and Confluence
- Collaborated with a Senior Software Engineer on the addition of Rocket Mortgage to eMoney Advisor's supported institutions
- Used TDD (Test-Driven Development) to safely and effectively develop new features and bug fixes using both NUnit tests and a company provided QA environment
- Helped to maintain a codebase of over 100,202 lines while facilitating the aggregation of data from 63+ financial institutions using REST APIs
- Monitored code in production after deployments using Elasticsearch and Kibana
- Reviewed PRs in Bitbucket while adhering to company coding standards
- Built and deployed software using industry standard tools like Jenkins and Octopus

THE TRIANGLE (STUDENT-RUN PUBLICATION)

Philadelphia, PA

Software Developer

Sep 2025 – Present

- Worked within a team of 3 to write an ETL pipeline in Python from scratch, responsible for processing over 18,000 articles
- Coordinated with Triangle leadership and other members of the Triangle IT team to facilitate a transition from WordPress to a homegrown React site and self-hosted MariaDB database
- Wrote a bespoke entity resolution system from scratch using technical concepts such as MinHashing and memoization while using libraries such as NumPy to ensure efficient matrix operations
- Guaranteed smooth future handoffs of infrastructure by writing clean documentation and heavily utilizing type annotations in more complex areas of backend code
- Provided IT support during crucial windows of time in the Triangle print cycle

PROJECTS

DREXEL DINING APP | *Fullstack Developer*

Jan 2025 – Present

- Built and refactored a multipage nutrition tracking app using the Flutter UI framework
- Created a robust web scraper in Python using the Selenium and BeautifulSoup libraries
- Integrated both SQLite and JSON databases with a live Flutter application
- Worked within Agile methodologies to flexibly and quickly deliver on milestone features

PILL REMINDER | *Backend Developer*

Apr 2025

- Developed and presented a medication reminder app designed to help senior citizens using Flutter during the 24-hour DragonHacks hackathon
- Implemented a RESTful API using Flask enabling real-time image and JSON data transfer between the client and server
- Used Google's Gemini API to read and process text from standard prescription labels
- Utilized Git's robust version management capabilities to organize and store the 100+ commits of code produced

ACTIVITIES AND LEADERSHIP

PAIDEIA SCHOOL ROBOTICS TEAM | *Team Captain*

Aug 2021 – Jun 2024

- Led a team of 4 people with varying skill levels to create a specialized robot for VEX Robotics
- Created a competition ready autonomous program by implementing motion profiling and PID controllers in C++
- Finished in the top 10 in the GA Championship and competed in the World Championship
