Education

Drexel University

Sep 2024 – Jun 2029

Bachelors of Science in Computer Science

- **Relevant Coursework** - Advanced Programming Tools and Techniques, Introduction to Software Engineering and Development, Computing Informatics and Design I – III, Computer Programming I – II, Calculus I-III

Experience

Software Engineer Co-op

Radnor, PA

eMoney Advisor

Sep 2025 – Mar 2026

- Helped to maintain a codebase of over 1,337,282 lines while facilitating the aggregation of data from 12,000+ financial institutions using REST APIs
- Developed and maintained .NET code within a 25+ engineer SAFe Agile team using Jira and Confluence
- Worked on a three person team to successfully complete and handle the trial deployment of the Rocket Mortgage integration
- Used TDD (Test-Driven Development) to safely and effectively develop new features and bug fixes using both NUnit tests and a company provided QA environment
- Monitored code in production using Elasticsearch and successfully diagnosed and handled an issue with a major integration
- Built and deployed software using industry standard tools like Jenkins and Octopus

Full-stack Developer

Philadelphia, PA

The Triangle - Drexel University Student Newspaper

2025 – Present

- Working with Triangle leadership and a 4 person engineering team to transition from WordPress to bespoke infrastructure
- Developing a headless CMS (Content-Management-System) utilizing a RESTful API coded in Golang and minimal frontend made with React, responsible for allowing editors to publish and edit articles stored in a self-hosted MariaDB server
- Built a Python ETL (Extract, Transform, Load) pipeline from the ground up, processing 11+ years of legacy WordPress data including 18k+ articles and 5k+ authors for migration to the Triangle's new CMS
- Wrote an entity resolution system from scratch using techniques like MinHashing and memoization while using libraries such as NumPy and Numba to optimize critical steps

Projects

Minhashlib

github.com/ssavutu/minhashlib 

- Built and published a high-performance Minhash similarity detection Python library for use on large sets of strings
- Achieved a ~6x speed improvement over the 'datasketch' library while maintaining comparable accuracy
- Optimized signature generation via vectorized operations and JIT compilation using Numba
- Utilized Minhashlib in a production critical ETL pipeline at The Triangle

DragonFuel

github.com/ssavutu/DragonFuel 

- Built a multipage nutrition tracking app using the Flutter UI framework
- Created a robust web scraper in Python using the Selenium and BeautifulSoup libraries
- Integrated both SQLite and JSON databases with a live Flutter application
- Worked within Agile methodologies to flexibly and quickly deliver on milestone features

RxBuddy

github.com/ssavutu/RxBuddy 

- Developed a medication reminder app using Flutter for the 24-hour DragonHacks hackathon
- Implemented a RESTful API using Flask enabling real-time image and JSON data transfer
- Used Google's Gemini API to read and process text from standard prescription labels
- Utilized Git's robust version management capabilities to organize and store the 100+ commits of code produced

Skills

Languages: Python, C#, C, C++, JavaScript, HTML, CSS, TypeScript, Dart, SQL, Regex, JSON, BASH, LaTeX, Markdown

Technologies: .NET, NUnit, Flutter, React, Selenium, BeautifulSoup, SQLite, Gemini API, Flask, MariaDB, NumPy, Numba

Software: Linux, Git, GitHub, Bitbucket, Jira, Confluence, Octopus, Jenkins, Elasticsearch
